

Look for	Right	Wrong
<b>PLUGS:</b> Cracks / burns to the casing		
<b>PINS:</b> Damaged / bent / corroded pins		
<b>CORDS:</b> Poorly connected / damaged cord		
<b>2-PIN:</b> Two pin plugs must only be used with a CE Marked Adaptor		<b>NEVER</b> force a 2 pin plug into a 3 pin socket 

<b>EQUIPMENT</b>
<p><b>Look for:</b></p> <ul style="list-style-type: none"> <li>Loose switches</li> <li>Burn marks</li> <li>Loose panels</li> <li>Cracks</li> <li>Corrosion</li> <li>Damage</li> <li>Water damage</li> </ul> <p style="text-align: center;">Check the Test and Inspection label</p> <p><b>NOTE:</b> Aquaria labels may be a different colour</p>

### **Working with Aquariums**

Aquariums use both water and electricity which when mixed, can be dangerous if not handled correctly, leading to serious injuries.

Always check the following before working in and around aquariums.

<b>Aquariums</b>	<b>What to look for</b>
The tank is earthed	

IP Rated Electrical Sockets – ensure sockets have covers to protect them from water
